

Tuesday, August 26, 2014 5:30 p.m.

South Shore Pavilion 2900 South Shore Drive (Registration is NOT required)

The purpose of this meeting is to provide information for the South Shore Park Site Investigation and Schematic Design Project. This project is defined as an investigation and preliminary design of the parking lot and beach area of the Park with a special focus on storm water and beach quality. The project will look holistically at the entire South Shore Park and surrounding areas to consider effects on the detailed study area.

Questions and Answers with open floor discussion for the public. Bring your friends, neighbors and family members.
